

Bodegas ESPAÑA (making wines under the new "Varietales de España" classification) is a project that allows us to offer very good wines to wine lovers with an excellent value for money, given that Spain is the country with the largest vineyard area in the world. The wines have been developed in Central Spain with complete traceability from the vineyard and subject to full compliance with the highest quality systems such as IFS (International Food Standard). We present these varieties with specific blends following the

requirements of the market. Among the white varieties, in addition to Macabeo and Verdejo, we produce Moscatel (of small grain) and Sauvignon Blanc which is perfectly adapted to this terroir. As for red grapes, in addition to Tempranillo, Bobal and Garnacha - the main ones used - we also have others such as Tinto Velasco (similar to coarse-grained Merlot) and Syrah, of French origin but very well adapted to this part of Spain.

THE HARVEST

The meteorological variability was the recurring factor throughout this very atypical vintage, and conditioned the harvest both in quantity and quality. In the fall of 2020, the vine started from an unfavorable situation due to the scarce reserve of edaphic water, which together with the scarcity of rains compromised the accumulation of reserves in the plant for the sprouting of the following year. With winter came the first adversity for the vineyard, in the first half of January a historical snowstorm associated with the storm Filomena, followed by a no less important cold wave, with temperatures of down to -16° C, caused death of buds and even of complete parts of the strains. The autochthonous varieties, with later cycles and better adapted to the climate, held out well. A new rainy season in mid-September interrupted the harvest and had adverse effects on ripening in the later areas as it favored the appearance of fungal foci that made the selection of bunches essential to maintain quality standards. Viticulture has the charm of seeing the character of the vine, the soil, the climate and the work of the viticulturist imprinted on the wines. This year has been a complicated year, the highly variable weather has required additional efforts both in the vineyard and in the winery to transmit the best of the grape through the wines.

VINIFICATION

Bobal based rosé, with a prior short skin maceration and then fermented in stainless steel at low temperature (17°C) like a white wine.

TASTING NOTES

Colour: Clean and bright, pale rosé wine.

Nose: Fresh and with aromas of berries.

Palate: Persistent and with friendly fruit on the palate.

Food pairing: Pasta, cold cuts, fish and white meat as well as white meat in sauce.

TECHNICAL DATA

| | |
|-------------------------------|-------------|
| Varietals | 100% Bobal. |
| Alcohol content (vol) | 12% |
| Acidity total (gr/l) | 4.95 g/L |
| pH | 3.34 |
| SO2 free (mg/l) | 35 g/L |
| Total Sulphites (mg/L) | 86 |
| Residual sugar (gr/l) | 0.96 g/L |
| Suggested serving temperature | 9-10°C |
